Granulomatosis with polyangiitis (Wegener's) is believed to be an autoimmune disorder. This means the body's immune defenses mistakenly attack the body's own cells and tissues. In this case, the misdirected immune attack is aimed at the blood vessels. This triggers inflammation and damage.

Granulomatosis with polyangiitis (Wegener's) Guide: Causes ...

Wegener's granulomatosis belongs to the family of autoimmune diseases known as vasculitis. It is characterized by inflammation of the smaller arteries and veins in the respiratory tract and kidneys. This restricts blood flow to these organs, which can damage them.

Signs and Symptoms of Wegener's Granulomatosis

Granulomatosis with polyangiitis (GPA) is a type of vasculitis or swelling (inflammation) of the blood vessels. The disease can cause swelling of the blood vessels anywhere in the body but mainly impacts the sinuses, nose, trachea (windpipe), lungs, and kidneys.

Granulomatosis with polyangiitis | Genetic and Rare ...

Granulomatosis with polyangiitis (GPA), previously known as Wegener's granulomatosis (WG), is an extremely rare long-term systemic disorder that involves the formation of granulomas and inflammation of blood vessels (vasculitis).

Granulomatosis with polyangiitis - Wikipedia

Granulomatosis with polyangiitis is a rare disease in which blood vessels become inflamed (a condition called vasculitis) and localized, nodular collections of abnormal inflammatory cells, known as granulomas, are found in affected tissues.; Granulomatosis is the term that refers to the presence of granulomas, which are small areas of inflammation filled with immune cells.

Granulomatosis with Polyangiitis (Wegener's): 17 Symptoms ...

Wegener's granulomatosis is a rare idiopathic condition resulting from changes in the small arteries, and has several clinical manifestations. Ear manifestations can be the first sign of the disease and Wegener's granulomatosis should be considered in patients with resistant ear symptoms in order to achieve an early diagnosis.

Otologic Manifestations and Progression in Patients with ...

Granulomatosis with polyangiitis (GPA, formerly called Wegener's) is a rare disease of uncertain cause. It is the result of inflammation within the tissues called granulomatous inflammation and blood vessel inflammation ("vasculitis"), which can damage organ systems.
