Elementary Physical Science - Changes In Matter | Science4Us
The Changes in Matter module further explores the concepts from previous modules, and looks at how matter may be modified or changed. Through an instructional video, games, and activities, students explore three types of changes that occur in matter: physical change, in which only the shape of the matter changes; physical phase change, in which matter changes to a different form (solid, liquid, or gas); and chemical change, in which matter is changed in a way that cannot be undone (fruits ...

Understanding Chemical & Physical Changes in Matter
Physical Changes Physical changes are concerned with energy and states of matter. A physical change does not produce a new substance, although the starting and ending materials may look very different from each other. Changes in state or phase (melting, freezing, vaporization, condensation, sublimation) are physical changes.

Understanding Chemical & Physical Changes in Matter
These books align with the second grade NGSS standards for Physical Science. Understanding properties of matter and states of matter are in the second grade Next Generation Science Standards, as well as reversible and irreversible changes. In the standards, students are asked to describe properties of matter, understand the properties of solids, liquids, and gases, and that matter changes depending on temperature.
