Compilation of Rare 1986 Videos of Chernobyl Disaster. (English)

This article was prompted by the 2019 television drama series 'Chernobyl', and focuses on human error, safety culture and designing for safety. It provides some discussion points to engage with your key stakeholders and to facilitate safety moments on various human factors topics. We can't change history, but we can change tomorrow.

Chernobyl: The drama - Human Factors 101

As far as safety is concerned, I accepted that there was a risk of sorts, but I was advised where the most highly contaminated areas were and to spend less time there. As the threat of radiation has diminished, the proliferation of wild boars has been somewhat concerning, but the current hazard is the buildings that are collapsing.
