Documentation

## **documentation**

Documenting your Python code is all centered on docstrings.

These are built-in strings that, when configured correctly, can help your users and yourself with your project's

documentation. Along with docstrings, Python also has the built-in function `help()` that prints out the objects docstring to the console. Here's a quick

## Python

### Documentation

Once you have read a tutorial, you can browse through Python's online documentation. It includes a tutorial that might come in handy, a Library Reference that lists all of the modules that come standard with Python, and the Language Reference for a complete (if rather dry) explanation of Python's syntax.
