the latest addition being the white-rumped swift.

## **List of birds of Great Britain - Wikipedia**

Birds of prey (Accipitriformes)The New World vultures are still generally considered a member of this order, although the inclusion is dubious at best. If they are included, the largest species in the order, if measured in regard to body weight and wingspan, is the Andean condor (*Vultur gryphus*) of western South America. The great bird can reach a wingspan of 3.2 m (10 ft) and a weight of 15 kg

Tanya Piejus / 500px / Getty Images. The great black-backed gull (*Larus marinus*) is the largest of the 19 gull species to be seen in Ohio, and is similar in size to a large raptor. Its heavy bill and dark mantle are other identification clues, and these birds are seen along the northern shoreline, especially in the Cleveland area. This gives even urban birders a great chance to see this gull.
