## Fossili

A fossil (from Classical Latin: fossilis, literally "obtained by digging") is any preserved remains, impression, or trace of any once-living thing from a past geological age. Examples include bones, shells, exoskeletons, stone imprints of animals or microbes, objects preserved in amber, hair, petrified wood, oil, coal, and DNA remnants. The totality of fossils is known as the fossil record.

## Fossil - Wikipedia

Fossili come indicatori ambientali Rana fossile, indicatrice di ambiente palustre , Repubblica Ceca I resti fossili non ci danno solo l'idea di quali siano stati gli animali e le piante del passato, ma ci indicano anche quale fosse l'ambiente e clima in cui vissero, spesso differente da quello odierno esistente nell'area del loro ritrovamento.

Fossils are a special type of currency that can be socketed into resonators to modify the crafting behavior in specific ways. Fossils can also add special Delve modifiers. WARNING: Despite the similar wording to chaos orbs, using a fossil + resonator on an item with a meta-crafting mod (Prefixes Cannot Be Changed or Cannot roll Caster Modifiers) will ignore that mod and overwrite existing ...

The Fossoli camp (Italian: Campo di Fossoli) was an internment camp in Italy, established during World War II and located in the village Fossoli, Carpi, Emilia-Romagna. It began as a prisoner of war camp in 1942, later being a Jewish concentration camp, then a police and transit camp, a labour collection centre for Germany and, finally, a refugee camp, before closing in 1970.

Fosili (na latinskom, fossus, što znači "iskopan") jesu mineralizirani ili drukčije sačuvani ostaci ili druge vrste tragova i otisaka (poput tragova stopala) životinja, biljaka i drugih organizama. Budući da se fosili nalaze u stijinama i sedimentnim stratama, također su poznati i pod nazivom fosilni zapisi. Proučavanjem fosila bavi se paleontologija.
