Over time, new branches and foliage grow in the area and make the shrub look good again. On the other hand, junipers don't have many dormant buds beneath their bark and don't develop dormant buds ...

How to Trim Overgrown Juniper | Home Guides | SF Gate
The best time to prune your junipers is in the winter or early spring. In the springtime, it's easier to see the general shape of the tree and cut the branches without having to worry about accidentally harming new growth. Winter pruning is a great option because it ensures that the plant is pruned before new growth begins.

How to Prune a Juniper Tree: 10 Steps (with Pictures ...
Juniper, as well as thuja, differs in type of growth from most conifers. For example, pine, as a typical representative of coniferous plants, gives an increase once a year. The buds that formed last year are beginning to grow in the spring, and this process continues until the summer.

Juniper Pruning - Detailed Guide - World of Garden Plants
Juniperus is a family of about 70 species of evergreen trees and shrubs, many of which are called "cedars". Other common names include mountain cedar, cedar juniper, and juniper redberry. Juniperus is widely distributed throughout North America, although certain species are more allergenic than others.
