Practical leather technology (Book, 1976) [WorldCat.org]

waterproof nature is known as leather. "Leather tanning" is a general term for the numerous processing steps involved in converting animal hides or skins into finished leather. Tanning is the final process in turning hides and skins into leather. Tanning involves a complex combination of mechanical and chemical processes.

Leather Processing & Tanning Technology Handbook

As the UK's only university to integrate leather technology with fashion, marketing, business and environmental concerns, we are proud to house an on-campus working tannery for practical leather making as well as laboratories to enable leather testing. Our range of courses, undergraduate and postgraduate, are as follows:

Leather Degrees and Masters | University of Northampton

Leather tanning is the process of converting raw hides or skins into leather. Hides and skins have the ability to absorb tannic acid and other chemical substances that prevent them from decaying, make them resistant to wetting, and keep them supple and durable.

9.15 Leather Tanning
