The purpose of the current meanderings is to discuss some of the possible approaches to assessment and report writing. The goal is to offer an improved sense of purpose and direction to the process of producing a useful psychological evaluation. This discussion will begin with a presentation of several "models" of psychological reports.

### Report Writing Theory

Writing a Debriefing Form for a Psychological Report This is the form that you should complete with your participants at the end of the study to ensure that they are happy with the way the study has been conducted, to explain to them the true nature of the study, to confirm consent and to give them the researcher's contact details in case they want to ask any further questions.

### Psychological Report Writing - Psychology Hub

Writing in psychology includes the following principles: Using plain language: Psychology writing is formal scientific writing that is plain and straightforward. Literary devices such as metaphors, alliteration, or anecdotes are not appropriate for writing in psychology.

### Writing in Psychology Overview // Purdue Writing Lab

In some areas of psychology, the titles of many empirical research reports are informal in a way that is perhaps best described as "cute." They usually take the form of a play on words or a well-known expression that relates to the topic under study. Here are some examples from recent issues of the Journal Psychological Science.

### Writing a Research Report in American Psychological ...

Ideally, the introduction should have a funnel structure: Start broad and then become more specific. The aims should not appear out of thin air, the preceding review of psychological literature should lead logically into the aims and hypothesis. • Start with general theory, briefly introducing the topic. Define the important key terms.
