RED recommends using manual sensor calibration (Manual Capture) for these sensors, because it provides the best image quality across a range of temperatures, and requires significantly less time for the entire process. Summary Table. The table below summarizes the recommended calibration methods for the sensors in the DSMC2 camera lineup:

Canon U.S.A., Inc. | Camera User Manual

The camera will default to ISO 800 and can be adjusted to best suit your image capture needs. Adjust the exposure and lighting (or ND filters) to match. RED recommends adjusting the exposure only for creative control with motion blur. Check Exposure. Check exposure by using the in-camera goal post tool and Exposure false color mode.
